Original aids and complete alternatives

Use any area or an oral/familiar communication route. No printing is required. Model fiction remains supplied art; all own response interiors are genuinely empty.

Paper Harbour — a fictional model

Borrow one idea, change it, or leave this model aside.

An original filled fictional scene called Paper Harbour. A blue rounded watching patch is on the left, with a broad seat line. A peach making patch is on the right, with a large drawn page and three broad marks. A wide unlabelled curved connection runs between the patches. A round yellow visitor is near the watching patch; a tall purple visitor is near the making patch. A message below says Ask before joining. The picture supplies choices and a message; it contains no child work, actual people, real location, tested access or recorded response. A child may give the marks another meaning or ignore the scene. Title and instruction sit above the scene. The footer identifies original supplied fiction, NeuroForgeIO Pty Ltd 2026 and CC BY 4.0.

Visible outside labels: Watching patch; Making patch; Ask before joining.; Original supplied fiction — your idea can be different.; No actual visitor, real place or child result is supplied.

My tiny welcome

Choose one part, tell it, or direct a maker.

A portrait page with two genuinely empty white rounded response areas. The large upper area is for an own place or welcome idea; a separate smaller area below is for one meaning if wanted. Labels are outside both interiors. No scene, route, visitor, meaning, mark or child answer is supplied. Any area may remain empty, and an oral or familiar communication route is complete. Title and instruction are above the areas. Complete footer: Original empty play aid · rest, finish or leave areas empty. © NeuroForgeIO Pty Ltd 2026 · CC BY 4.0.

Visible outside labels: My place or welcome idea; One meaning, if wanted

Two ideas can have room

Use either space, both, or a spoken scene.

A portrait page with two broad genuinely empty white rounded panels, one above the other. The outside labels are One possible idea and Another possible idea. Neither panel supplies a preference, role, agreement or connecting route. They can hold different ideas, remain separate or be unused. There is no required pair of answers. Title and instruction are above the panels. Complete footer: Original empty play aid · rest, finish or leave areas empty. © NeuroForgeIO Pty Ltd 2026 · CC BY 4.0.

One change, if wanted

A plan stays a plan until a chosen try happens.

A portrait page with three genuinely empty white rounded areas in a vertical sequence. Two roomy panels carry outside labels for A first idea made or described now and One possible change. A broad empty strip below is labelled outside What actually happened, or leave empty. No earlier work, change, trial, improvement, result or child choice is filled in. An untried plan does not require a result. Title and instruction are above the areas. Complete footer: Original empty play aid · rest, finish or leave areas empty. © NeuroForgeIO Pty Ltd 2026 · CC BY 4.0.

A message and a place for it

A mark, sign, spoken idea or your own way can work.

A portrait page with three genuinely empty white rounded areas. A large top panel is for My message, if wanted; two smaller panels below are for Its agreed meaning here and Where it goes, or keep it private. All labels are outside the interiors. No message, recipient, universal symbol, storage place or result is supplied. An adult can scribe only on the child's direction; a private or unwritten message is welcome. Title and instruction are above the areas. Complete footer: Original empty play aid · rest, finish or leave areas empty. © NeuroForgeIO Pty Ltd 2026 · CC BY 4.0.
