

One reported paper-roof trial

Same gap and disk · different material · only one described result

TRY 1 · TISSUE

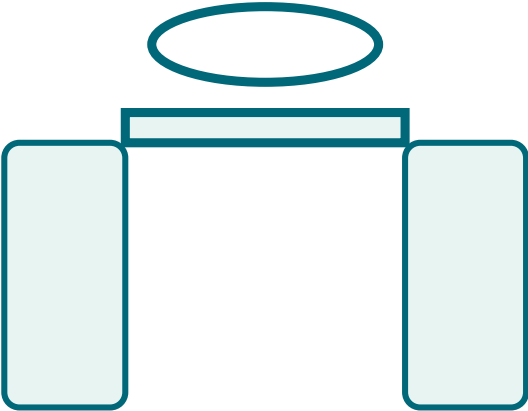

same broad disk

Reported: tore

TRY 2 · CARD

same broad disk

Reported: stayed whole

Original adult-read fictional report

Ari put two small cardboard blocks the same distance apart. Ari laid a tissue-paper strip across the gap as a roof and placed one broad cardboard disk on it. In this report the tissue tore. Ari put a card strip of the same length across the same gap and used the same disk. In this report the card stayed whole. Ari did not try a second disk or test a different gap.
