

One model report · keep its scope

Diagrams illustrate the report; no material experiment is performed here.

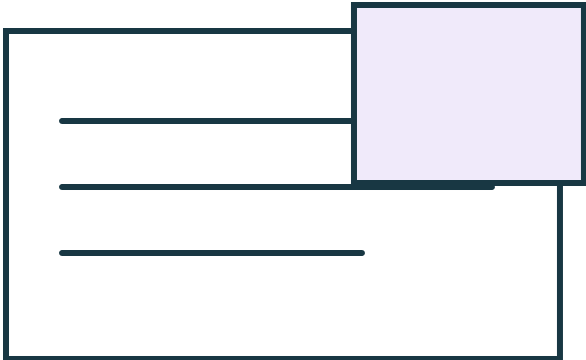

SOURCE E · ONE MODEL REPORT

“Before my model try, the paper picture page was visible. In one try, a paper cover hid part of that page. I have not tried this in a real place.”

BEFORE · REPORTED MODEL

AFTER · ONE REPORTED TRY

KEEP THE REPORT SMALL

One reported model try. Not a real place, every cover, plant result, use permission or a trial done by the learner.

What actual source or approved try would help next?
