A part, a material, a property

Drawing is a model; not proof of a real cloth’s fibres or filling.

WHICH PART CAN YOU NOTICE?

EDGE / SIDE

DRAWN FOLD OF ONE CLOTH

A folded cloth can still be the same material.

What is it made from? Check a reliable label, or say UNKNOWN.

A picture or soft feel does not tell us what is hidden inside.

If more than one material is named, say which part it belongs to.

What did you actually notice about your chosen part?

YOUR PART / MATERIAL OR UNKNOWN / PROPERTY
