

One part can be large

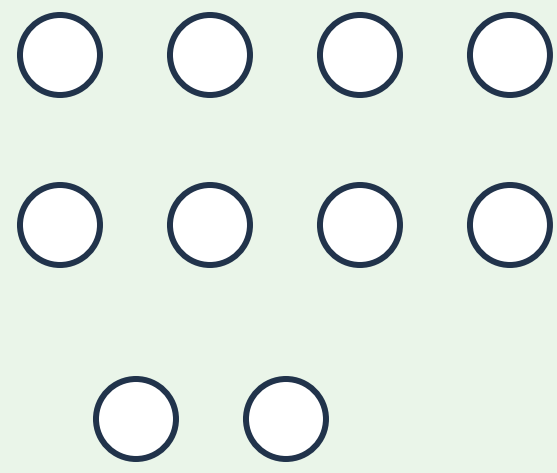

Adult example of one large among ten discs versus equal-size discs.

TWO ADULT-MADE SIZE IDEAS

IDEA A · ONE LARGE

A light blue rectangular box containing ten white circles. One circle in the center is significantly larger than the other nine, which are all of equal size and arranged around it.

IDEA B · ALL EQUAL

A light green rectangular box containing ten white circles of equal size. They are arranged in three rows: four in the top row, four in the middle row, and two in the bottom row.

Which part would you make larger, smaller or equal?

Name a visual purpose; no viewer has been tested.

Ten marks are supplied, not a count test here.
