

Make a method another reader can follow

The order explains what the result does and does not mean.

1 • QUESTION

Which drawn layout needs fewer instructed turns?

2 • MATCH

Use the same six search prompts in A and B.

3 • TRACE

Follow paper arrows; no person uses the index.

4 • COUNT

Record page turns for each scripted route.

5 • HANDLE A GAP

Do not set an unreadable endpoint to zero.

6 • REPORT

Compare five complete pairs; name untested use.

A drawn count is not a human trial or a speed measure.
