

Two valid figures, two different groups

Put the reference group beside each claim.

NAMED ROUTES ONLY

21 / 30 = 70% same-day tags

Excludes 6 route-unreadable tags.

ALL TAGS

22 / 36 $\approx$ 61.1% same-day tags

Includes 6 route-unreadable tags: 1 same day, 5 later.

REPORT ORDER AND READER EFFECT

Title → first figure → where is the qualification?

Which group could a reader assume from line one?

LIMIT: constructed tags, not causes or real service.

Unknown route does not mean unknown finish status.
