

# Source to claim: how far may it travel?

Trace the constructed source before choosing a public sentence.

## 1 · QUESTION AND METHOD

What was constructed? How were records made?

---

## 2 · COUNTED UNIT AND COMPLETE SET

Five complete paired routes; instructed page turns.

---

## 3 · SUPPORTED CLAIM

B averages 4.4 turns; A averages 6.0 in the drawing.

---

## 4 · GAP AND UNTESTED OUTCOME

One B route lacks an endpoint. No readers or time tested.

My limit / next question:

---

**Avoid: 'faster for everyone' from a page-turn drawing.**

Keep source, group, unit and unknown together.
