

DENOMINATOR WINDOWS

Move the category boundary; keep the fictional source cells fixed.

FRAME 1 · ALL PAPER TILES

Hatch + Ring + Solid

Passed ____ of all ____ = ____ %

Included rows: Hatch, Ring, Solid

What was observed? One fictional desk print check.

FRAME 2 · SELECTED FAMILIES

Hatch + Ring only; Solid omitted

Passed ____ of selected ____ = ____ %

Which source cells changed? None.

Why can the second frame not stand for all tiles?

A changed denominator is a changed question.
