

Question → source → conclusion

A small model must keep its counted unit and unknowns visible.

1 · QUESTION / PURPOSE

What could this source actually answer?

2 · ORIGIN / METHOD / UNIT

Constructed, official, observed or still unknown?

3 · PATTERN WITH ITS GROUP

State the numerator, denominator or compared cases.

4 · GAP / ALTERNATIVE / NEXT CHECK

Keep an anomaly or missing category visible.

Do not turn a fictional count into a real outcome.

My conclusion is limited to:
