

Model boundary mat

Label, inference and unknown are different claims.

Use the incomplete sketch: membrane and ribosomes are labelled.

1 STATED IN DRAWING

Plasma membrane and ribosomes are labelled.

This is evidence about this drawing.

2 SUPPORTED INTERPRETATION

It is a schematic cell; both cell patterns can fit.

Name why your comparison is cautious.

3 NOT SETTLED

A nucleus is not shown in the unfinished sketch.

Blank space does not prove biological absence.

4 BETTER NEXT QUESTION

Is the feature inventory complete for this test?

If not, ask for more information.
