

Evidence ladder

Keep each claim at its actual source level.

1 SCRIPTED BRIEF FACT

Card B has two side-room entrances marked L and R.

This is a fictional card fact, not a real interview.

2 CAUTIOUS INFERENCE

Full-word room names might reduce ambiguity.

A possible design idea; no use outcome is known.

3 UNSUPPORTED CLAIM

Every performer will find the rooms quickly.

No timing, user sample or real-site test is supplied.

4 NEXT EVIDENCE

Ask a consented stakeholder to try a prototype.

A proposed check is not a reported result.
