Home 26 · Guess with a clue

Try one tiny turn.

Prepare: Safe large paper pieces or a MODEL collection of three known 15-piece groups and 5 loose pieces.

Invitation: Give a rough estimate using a known group before revealing/counting all pieces. Keep estimate and exact count separate.

Adult worked model/check: Around 50; supplied exact 45 + 5 = 50. A different own collection has its own count.

Choice and boundary: Do not demand closeness or speed. Adult checks object suitability; no tiny pieces required.

Usual communication, exact scribing, private/untimed work and stopping are welcome. Keep a model answer separate from your child's own attempt; do not correct it silently. Observe one useful reason and choose a new unrelated example if wanted.
