My useful measurement

YOUR RESPONSE · choose your usual communication

Choose a safe familiar job with an adult. Use real labelled kit only if suitable; otherwise label your supplied model reading. No result has been filled in.

1. What is the job, attribute, unit and useful tool?

2. What benchmark and estimate could help before measuring?

3. What did you actually read or do? Record help; label a supplied model if used.

4. What decision does it support, and what still needs checking?
