My estimate and check

YOUR RESPONSE · choose your usual communication

Choose your own ordinary collection or practical additive model. Keep an estimate before a count/calculation separate from an exact result.

1. What question and known-group or number benchmark will help?

2. What is your estimate and why could it be useful?

3. What is the exact count or calculation, with its unit and source?

4. How does your check connect to the decision? What remains unknown?
