MODEL · five unit fractions

MODEL · one whole, equal parts, clear labels

One whole split into 2 equal parts: one part = 1/2

One whole split into 3 equal parts: one part = 1/3

One whole split into 4 equal parts: one part = 1/4

One whole split into 5 equal parts: one part = 1/5

One whole split into 10 equal parts: one part = 1/10

Each row is its own equal-length whole. Only the first part is shaded. The denominator names all equal parts; a multiple counts selected unit parts. Same fraction names do not make parts of differently sized wholes equal.

Use the complete words or an ordinary blank page. This is a model, not your own response.
