YOUR RESPONSE · words, drawing, signing or wanted help

ORIGINAL FICTIONAL SOURCE: Question: What type labels are in these fictional display labels? One card is one record; variable is type label. Complete available labels in order: star, leaf, star, moon, leaf, star. There are 1 additional unavailable label records. The proposed category rows are star, leaf, moon, sun. Unavailable is a status, not a named type. No real survey or preference information is supplied.

1. State the data unit and variable. Is the variable categorical or a discrete numerical count?

2. Make or describe a frequency table for all named categories and record unavailable separately.

3. Give known-record and all-record totals, and explain what the zero named category can mean.

4. Give one statement supported by these records and one specific way to check the table.
