Home 36 · A tiny question

Try one little turn.

Prepare: Safe familiar paper marks or the full fictional list red,blue,red,green,blue.

Invitation: Ask one category question, name one record and choose a sensible rule. Allow descriptions/labels instead of colour vision.

Adult model/check: MODEL: one paper mark is the unit; red 2,blue 2,green 1 totals 5. These are provided data, not your home inventory.

Observe and respond: Ask for one useful reason; keep the child's response as actually made. If two variables overlap, choose one question and one category per item. No private household or people survey.

Usual communication, wanted exact scribing, private/untimed work, rest and stopping are welcome. No purchase, photo or upload. A model is not an observation of your home; actual child mathematical choice, helper physical action and any real willing-reader trial are separately named.
