Home 39 · A table a reader can use

Try one little turn.

Prepare: A child’s own ordinary table or fictional labels paint,draw,draw,paint,join.

Invitation: Ask for title/unit/full records. Child can revise one label after a willing reader trial or own check; no upload.

Adult model/check: MODEL: paint 2,draw 2,join 1,total 5 records. Different row order preserves counts. It does not show what everyone likes.

Observe and respond: Ask for one useful reason; keep the child's response as actually made. If interpretation goes beyond the records, narrow it to this set and state any missing information.

Usual communication, wanted exact scribing, private/untimed work, rest and stopping are welcome. No purchase, photo or upload. A model is not an observation of your home; actual child mathematical choice, helper physical action and any real willing-reader trial are separately named.
