Home 40 · Choose one useful next turn

Try one little turn.

Prepare: Pick an ordinary fraction or table example; leave held tests closed.

Invitation: Ask what helped, what still needs checking and what support would be useful. A short answer or a pause is fine.

Adult model/check: MODEL fraction: one of three equal parts is 1/3. MODEL data: six labels A,A,B,C,B,A givesA 3/B 2/C 1. They have different wholes/units.

Observe and respond: Ask for one useful reason; keep the child's response as actually made. Choose a new unrelated example for the specific gap. No score, speed, diagnosis or comparison with siblings.

Usual communication, wanted exact scribing, private/untimed work, rest and stopping are welcome. No purchase, photo or upload. A model is not an observation of your home; actual child mathematical choice, helper physical action and any real willing-reader trial are separately named.
