MODEL · gaps, not ticks

MODEL · three-fifths from zero

Whole is the interval from 0 to 1. Five equal gaps lie between six boundary marks;3/5 is three gaps from 0. Two more one-fifth gaps complete it.

3/5 + 2/5 = 1 whole

The point at 3/5 is named in words as well as marked. These are mathematical intervals, not physical centimetres. A line with unequal gaps would not show equal fifths accurately.

Try a different line of your own or describe its ordered labels. Making/drawing, adult operation and mathematical directing are separately recorded.
