

Agency + abstract noun lens

A noun can summarise an action. Check what it hides.

Example from the invented route log:

Actor + action

The crew moved the arrow.

Useful short reference

The move / the sign change (after action is clear)

ASK FOUR QUESTIONS BEFORE CONDENSING

1 Who acted?

2 What happened?

3 Which summary noun names that action?

4 What does the source NOT establish?

Use a noun to guide the reader, not to invent a result.
